Cars have problems.

Everyone has insurance on their vehicle to protect them in the event of an accident. However, did you know that less than 20 percent of people ever use their collision insurance? Did you know that the average engine costs **\$7,349** to repair; the average transmission is **\$3,911** to repair, and those are just the major parts! Other minor repairs can cost between **\$300.00** all the way to **\$3,000.00**.

The question you have to ask as a driver is simple: do you want to pay for those huge repair costs, or would you rather have someone else pay it for you? With a **RED Shield Vehicle Protection plan**, we pay for your repairs so you don't have to!

A mechanical breakdown can be very stressful—not only costing you money, but your time. That's why **all of our protection plans come included with emergency roadside assistance, first day rental car benefits, and travel interruption coverage—all at no extra cost to you.**

With a **RED Shield protection plan**, you know that you have someone to call when if you are ever stranded on the side of the road, we will put you in a rental car, and most importantly, pay the bill on covered repairs. One covered repair alone will pay for the cost of one of our protection plans! You also have the peace of mind knowing you are covered by a company that is insured by an "A" rated insurer, has an **"A+" rating with the Better Business Bureau**, and has a reputation for having the best customer and claims service in the industry.
